Assignment 6:
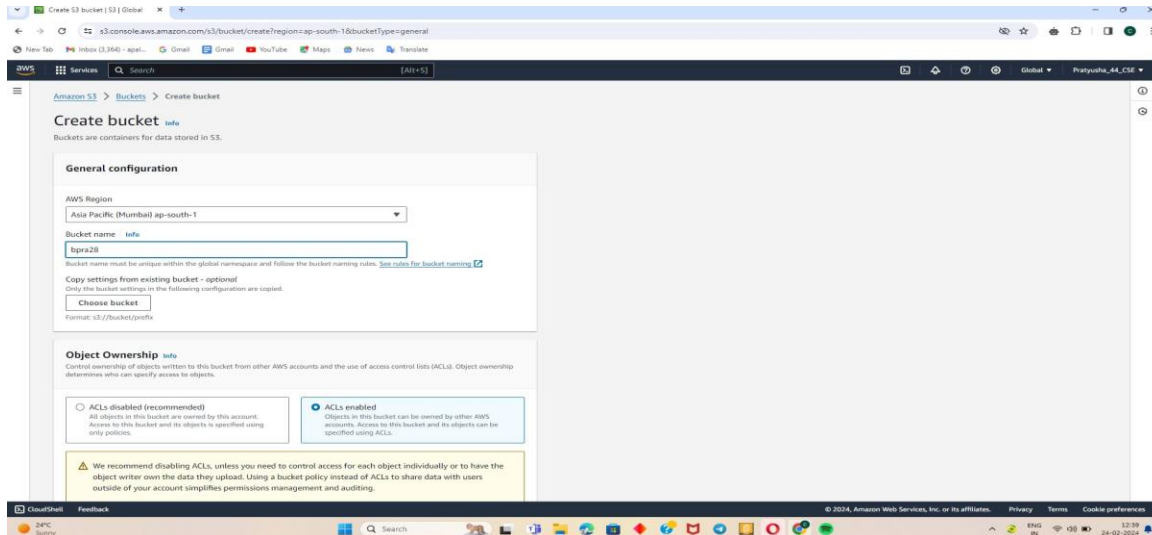

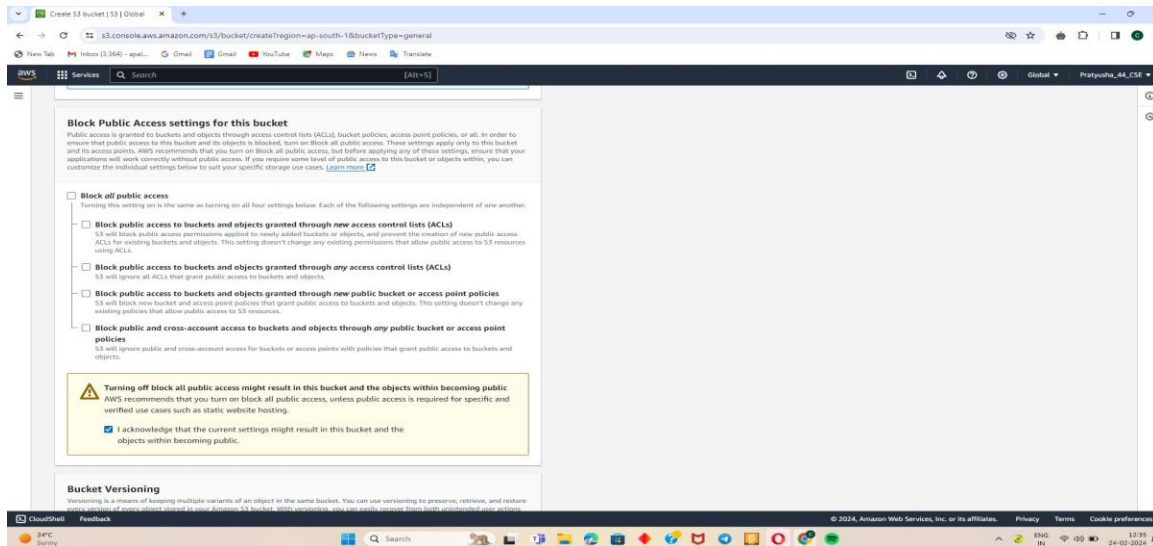

Upload a static website on S3.

Steps:

1.Click on S3 and click on Create bucket.

2. Now give region Mumbai and give bucket name then click on ACLs enabled.

3. Now uncheck Block all public access and click on check box I acknowledge that the current settings might result in this bucket and the objects within becoming public. Then click on create bucket.

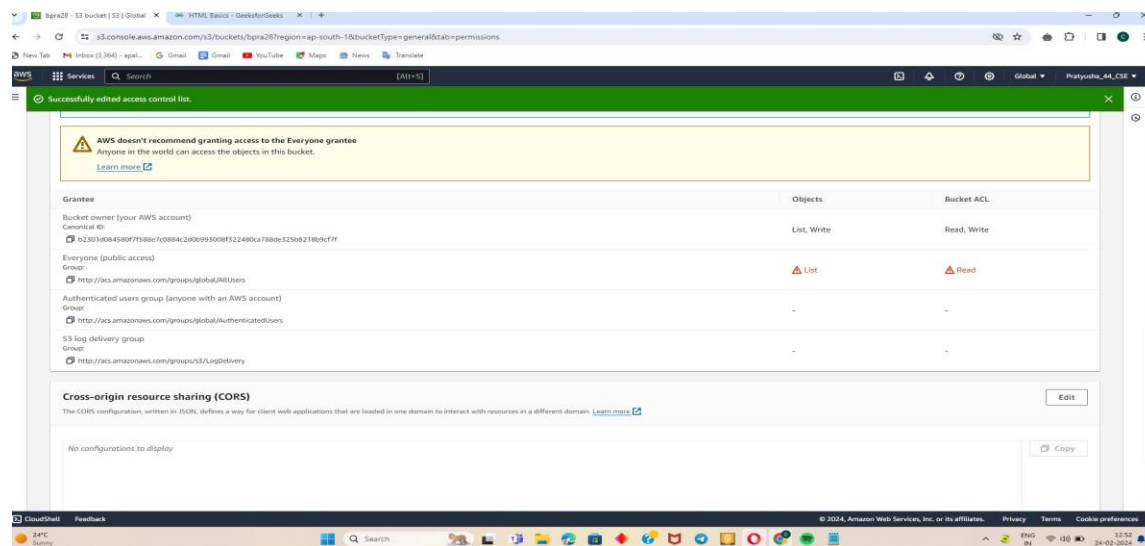

4. Now click on bucket name and then click on upload.

5. Click on Add files and upload any three html file. Then click on upload.

6..Now after uploading click on Permission dropdown and click on check box Specify individual ACL permissions. And click on check box of Read and write in Everyone(public access).

7.Now click on Edit Static Website Hosting then type index document then click on Save Changes.

8.Now copy the bucket website endpoint and then copy the url in another window.
